SLIMLINE Gas Fireplace Guide

Designed to bring coziness to compact spaces.

The SlimLine brings a full fireside experience in a shallow footprint.

Sized to Fit Beautifully

Choose the width that works for your space: 28", 32", 36" or 42". With a shallow 16-1/4-inch-deep profile, the SlimLine opens up more possibilities for creative placement, even where space is tight.

Built for Real Comfort

Welcoming flames, glowing embers and hand-painted logs create a warm, inviting focal point. The SlimLine feels as good as it looks, bringing atmosphere and coziness together in one refined experience.

Style It Your Way

Make it your own with a range of trims, finishings, interior options and accessories. Whether your taste leans modern, traditional, or somewhere in between, the SlimLine adapts to your space and style.

Shown on front: SlimLine 7X with Reflective Black glass, Birch logs and Clean Face front with ClearVue mesh.

SlimLine 7X with Stratford brick, Oak logs and Clean Face front with ClearVue mesh.

Features

- Seven models within the collection
- Up to 35,000 BTUs
- IntelliFire® ignition system makes operation simple, smart and safe (via wall switch or remote)
- Direct Vent Technology removes 100% combustion exhaust from your home
- Oak or Birch logs
- Choose from five front designs and three interior panel options*
- Glowing ember bed (LED for X models)
- Battery backup provides warmth during power outages
- Clear Vue mesh front adds safety and clearer view of the fire

*Varies by model

Options

- Power Venting Technology allows for flexible fireplace placement
- Heat Management redirects heat throughout the house or outside

Product Details

Understanding Your Options

With a thoughtful mix of front and interior designs, plus control options and heat outputs, each SlimLine model is made to complement your style and the way you live.

CHOOSE YOUR MODEL

SL MODELS: Beautiful flames, a warm natural glow, and realistic logs — everything you need for a classic fire.
X MODELS: All the beauty of SL, plus more heat, high-definition log details, and LED embers for a bolder look.

SPACE. SIZE. SELECT.

Consider heat output, room dimensions and venting in your space. And then select a 28, 32, 36 or 42-inch wide model.

GUN METAL

Interior Panels

Interior panels add depth, dimension and personality to your fireplace. This backdrop enhances the flame and transforms the entire look.

STRATFORD BRICK
Included standard on X collection models.
Optional upgrade for SL models.

TRANQUIL GREIGE BRICK
Standard on X collection models.

FADE-RESISTANT REFLECTIVE BLACK GLASS*
Included standard on X collection models.
Optional upgrade for SL models.

*Shown on front cover and page 6.

Controls

Whether it's the IntelliFire® app that lets you start the fire from your phone (even when you're not home), a sleek touchscreen remote that gives you easy access to flame height and fan speed, or a simple wall switch for quick on-off convenience, there's an option that fits your life.

INTELLIFIRE APP

WIRELESS WALL SWITCH

TOUCHSCREEN REMOTE

Technologies

DIRECT VENT TECHNOLOGY

Direct vent fireplaces are sealed systems that pull fresh air from outside and send 100% of combustion exhaust back outdoors. That means no fumes enter your home. The result is efficient heating, better energy use and cleaner indoor air quality.

INTELLIFIRE TOUCH® IGNITION SYSTEM

IntelliFire Touch is an advanced intermittent pilot ignition (IPI) system that makes starting and controlling your fireplace simple, safe and reliable. Applies to all control types (app, wall switch and touchscreen remote).

POWER VENTING TECHNOLOGY

Not every home is built for a traditional fireplace vent. Power venting uses a quiet, fan-assisted system that allows the venting to run up, down, sideways or around obstacles. This makes it possible to install a gas fireplace in spaces where it normally wouldn't work. Your local, authorized partner can help determine if your home requires this technology.

LED EMBER BED

This adds a realistic glow to your fireplace and enhances the ambiance. It's perfect for creating atmosphere year-round, with minimal energy use.

HEAT MANAGEMENT TECHNOLOGY

Redirect up to 50% of the heat to other areas of your home, while also reducing the wall temperature above the fireplace. Choose between a Heat-Zone kit to redirect the heat where you want it, or redirect up to 40% of the heat outside with a Heat-Out kit.

FADE-RESISTANT BLACK GLASS PANELS

These Black glass interior panels reflect the flames for a richer, more dramatic fire. They're designed to resist fading and discoloration over time, so your fireplace keeps its clean, modern appearance for years to come.

Specifications

MODEL	FRONT WIDTH		BACK WIDTH		HEIGHT		DEPTH		GLASS SIZE	BTU/HR INPUT (NG)

Dimensions above are in inches and millimeters. Product information is not complete and is subject to change without notice. Product installation must adhere strictly to instructions shipped with product. We recommend measuring individual units at installation. Assumes the use of 1/2-inch drywall. NOTE: Combustible material should not cover the face. Make sure you do NOT cover the decorative door opening.

Refer to installation manual for detailed specifications on installing this product. Heat & Glo reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Actual product appearance, including flame, may differ from product images
